# People-powered intranet

Welcome to the next generation of efficient knowledge management systems. Where organisations used to suffer from document-driven workflows and rigid systems for internal communication, the future now looks a lot brighter. BusinessPoint puts people first with a new level of usability and versatility.

BusinessPoint is a powerful intranet portal for companies who want to take their communication and collaboration to the next level. It is an extremely user-friendly product for transparent and efficient management of information. And it is also a versatile management tool with a very attractive price tag.

BusinessPoint requires no extra programming and no extra skills from its users. It is an all-included product with no need for add-ons and expensive modules. Nevertheless it is a full-blown solution for both small and large companies. See the technical data on the back page and contact your ScriptServer partner for further details.

Product profile

• **Easy management of knowledge**
• **Internal/external communication**
• **Straightforward functionality**
• **Browser access to applications**
• **No extra modules and add-ons are required**
• **Highly design customizable**
• **Personalized page layout**
• **Maximizing return on investment**

Installation

Straightforward installation: A wizard guides you through the installation step by step.

Security

BusinessPoint lets you manage pages and files in a quick, efficient and logical way and is compliant with NT-Security (windows accounts). BusinessPoint supports multiple user levels so that different employees can manage different areas of the intranet.

Scalability

BusinessPoint is suitable for both small large web sites. The application is scalable and dynamic.

Browser

Internet explorer 5.5, Mozilla Firefox 1.0 or later on PC for users.
Internet explorer 5.5 or later on PC for administrators and editors.

PDA access

BusinessPoint supports real-time PDA access. The mobile access to information and services from back-end systems makes it possible for customers and sales people on the move to work directly with their chosen business system through their handheld computer/phone.

Supported business systems

Microsoft Dynamics NAV:
3.60, 3.70A, 4.0

Requirements

Operative
Windows 2003, Windows 2000. Microsoft SQL Server 2000.
The installation also supplies a Microsoft SQL Server 2000 Desktop Engine (MSDE 2000) Release A.
